TECH PLAN 2015 - Copy.pdf;

Copy Attached - I have submitted this document with the changes. So we are all set and this process is now complete. There will be a step 2 in this process with the SMART Schools Bond Act. I believe the Application is out.

Michelle,

On one of your notes, you asked why we do not have written procedures in place for cybersecurity. We were advised to answer this question "NO" by BOCES because the State is looking for an example for these procedures and if we were to answer yes, the State may be interested in scrutinizing our procedures or making an example of the District for others as these procedures for school districts are still being thought through and developed. We will follow BOCES lead and develop this policy when the appropriate advisement has come out regarding what needs to be included in this policy and how it might impact the District.
