This is not SEX education, but rather LOVE education. SO......

for the BEST sex, slip on one of these

GO FOR THE GOLD ......TRUE LOVE DOESN'T SETTLE FOR ANYTHING LESS.

According to recent statistics, married people experience the greatest quality and quantity of sex.
There is only a 1 in 1,000,000 chance that you'll get pregnant.

There's a million to one chance that I will get pregnant.
To get off to a good start as a parent, it's important to be prepared.

As an **EXPECTANT FATHER**, you can prepare by:

- **PROVIDING** emotional support, encouragement and understanding to help make the pregnancy and childbirth easier for the woman.

- **SHARING** in planning and decision-making. As an expectant father, you will need to determine your own role as a parent. This may involve decisions about employment, living arrangements and time spent with your child.

**BOTH PARENTS** can prepare by:

- **LEARNING** as much as possible about pregnancy and childbirth. Reading, talking to other parents and attending childbirth classes can help overcome any fears and make things easier.

- **PLANNING** how you will continue your education, at least through high school. This will help you get jobs so that you can support a child.

**But...** childbirth is only the beginning of parenthood!
Progression of HIV/AIDS

HIV Negative

HIV Positive

6 Weeks–6 Months (Antibodies forming)

Goes for ELISA Blood Test

HIV Negative, HIV Positive,

6 Weeks–6 Months

(Antibodies forming)

Test is positive for HIV antibodies

Within 2 Years

Opportunistic Infection Develops (pneumonia or Kaposi's Sarcoma)

Within 2 Years

Within 2 Years

1–12 Years

HIV Symptomatic

Swollen Lymph Nodes

Fever and night sweats

Fatigue, cough, weight loss

Diarrhea, low resistance to infection

HIV Positive Asymptomatic

Feels healthy but spreading HIV
1. SEX:

2. Blood transfusion

How AIDS is spread (SE-47)
THE FEMALE BRAIN

FOOTNOTE: Note how closely connected the small sex cell is to the listening gland.
FOOTNOTE: the "Listening to children cry in the middle of the night" gland is not shown due to it's small and underdeveloped nature. Best viewed under a microscope.

Facts About The Male Reproductive System

Use the words listed below to label the diagram. Then write each word next to its definition.

- penis
- prostate gland
- urethra
- scrotum
- seminal vesicles
- sperm
- testicles
- vas deferens

Definitions

___ Sac of skin that holds the testicles, just underneath the penis.

___ Two glands on either side of the bladder that secrete seminal fluid.

___ Male reproductive cells.

___ Also called the testes; two oval-shaped organs that are contained in the scrotum. They produce the male hormone testosterone and sperm.

___ Male sex organ; also used to urinate.

___ Gland next to the bottom of the bladder; it forms a fluid that combines with sperm and a fluid from the seminal vesicles to make semen.

___ Tube that, at different times, carries urine and semen out of the body.

___ Tubes in which sperm is combined with other fluids from the prostate gland and seminal vesicles to make semen.
Use the words listed below to label the diagram. Then write each word next to its definition.

Definitions

---

Egg

Base of the uterus that has a small opening into the vagina.

Fallopian tubes

Also called an ovum; the female reproductive cell.

Ovary

Two tubes connecting the ovaries to the uterus through which the egg travels.

Uterus

Two glands, one on either side of the uterus, that contain a woman's egg cells and produce the hormones estrogen and progesterone.

Cervix

Also called the womb; a muscular organ lined with soft nourishing tissue that carries the fetus until birth.

Vagina

Endometrium

The flexible passageway leading from the cervix to the outside of the body. Menstrual fluid flows out of the body through this.
